Online registration of MyBitdefender is mandatory for receiving updates to keep you safe

2012 QUICK-START GUIDE

Copyright © Bitdefender

INSERT THE DISC

After inserting the disc, the Bitdefender Installer will start automatically. Click **Install** to begin.

To open the detailed Installation Guide, click the corresponding button.

Note. If the installer does not start automatically:

1. Open the Windows Start Menu and click **My Computer** (in Windows XP) or **Computer** (in Windows Vista or 7).
2. Right-click the icon of your disc drive and select **Explore** in the menu that appears to view the directory list of the disc.
3. Double-click the file **autorun.exe** to begin.

PREPARING THE INSTALLATION

Bitdefender performs a few checks before the installation.

If your system does not meet the minimum requirements for installing Bitdefender, you will be informed of the areas that need improvement before you can proceed.

If an older version of Bitdefender or a different security application is running on your system, you will be prompted to remove it. In this case, a system reboot will be required.

BITDEFENDER INSTALLATION

Step 1. Read the terms of the End-User License Agreement and if acceptable click **Agree & Continue**.

Step 2. Register your product by entering your license key in the provided text box and then clicking **Register Now**. Optionally, by clicking **Custom Settings** you can configure options, such as the installation path and proxy settings. Click **Install** to start the installation.

Step 3. Installation in progress. Your system is checked for viruses, the application files are installed, and the Bitdefender services are started. This step can take a couple of minutes.

Step 4. Installation completed. A summary is displayed. If any active malware was detected and removed during the installation, a system reboot may be required. Click **Finish** to complete the process.

ENJOY SILENT SECURITY

Once the installation is completed, your computer is protected.

Bitdefender will check for security updates every hour, and you are not required to configure any settings. However, feel free to take advantage of the configuration options to fine-tune and improve protection.

From time to time, open Bitdefender and fix any existing security issues.

For a completely hassle-free experience, make sure the Auto Pilot is engaged. You can turn the Auto Pilot on or off using the switch on the upper toolbar of the main Bitdefender window.
